

HRDAO Stakeholder Engagement Record & Feedback Log

Project Catalyst – Fund13 / Milestone 1

Prepared by: HRDAO Governance Team - Razali Samsudin

Timeframe: January–July 2025

This report anonymizes and summarizes engagement feedback for the purpose of research transparency and milestone validation. All entities listed were consulted in the context of stakeholder discovery. No data was collected or stored beyond what is publicly disclosed here.

Purpose

This document fulfills the requirements for Milestone 1 of the HRDAO project under Catalyst Fund13. It includes:

- A GDPR-compliant stakeholder engagement record
- Integrated feedback to inform the Project Plan and DAO Governance Whitepaper

Engagement Log (GDPR-Compliant Summary)

Mode	Stakeholder Type	Region	Focus Area	Feedback Summary
In-Person	VC/Accelerator	Europe	DAO investment model	Encouraged phased treasury strategy and equity/token split options
In-Person	NFT Platform (Photography)	Global	Cultural provenance infrastructure	Support for DAO integration of art ownership and metadata
In-Person	Art Café / Culture Hub	Europe	Physical-digital storytelling	Endorsed storytelling around resistance and memory
In-Person	PR / Media Platforms	Global	DAO communications	Feedback on narrative framing and regional messaging strategies
In-Person	Protocol Devs / Ecosystem Growth	Global	Tokenomics & onboarding UX	Supported reputation-based, privacy-preserving architecture

Online	Academic Research (PhD Program)	NZ	Tokenomics / DAO governance	Supported structured pilot and modular experimentation
Email	Digital Rights Network (NZ)	NZ	Human rights, digital wellbeing	Confirmed mission alignment with civil society values
Online	Open Certification Infra	Global	Proof-of-origin & transparency	DAO as a governance layer for verifiable credentials
Online	Wallet Infrastructure Team	Global	Self-custody / Identity recovery	Recommended smooth UX and layered trust recovery
In-Person	ReFi / Coordination Protocols	Global	Treasury & ecological infrastructure	Support for DAO coordination of climate/public goods
In-Person	Ecosystem Growth (TON)	Global	L1 expansion + gamified onboarding	Encouraged pilots and local DAO activations
In-Person	Web3 Exchange Startup	Korea	CEX-DAO education bridge	Potential for onboarding and content support

Feedback Integration Matrix

Area	Stakeholder Insight Integrated
Governance Architecture	Multi-tiered with DReps, sortition, veto, and community-rep layers
Token Design	Dual-token: governance (soulbound) + utility (fungible), with inflation and staking safeguards
DAO Onboarding UX	Narrative-first, gamified, multilingual onboarding embedded into plan
Privacy & Identity	zkID, DID, and contributor anonymity with verifiable activity credentials
Cultural & Ethical Layer	Anchored in human rights frameworks, with DAO Charter and SDG indicators
Coordination & ReFi	Integrated influence from ReFi commons and on-chain transparency partners

GDPR Disclaimer

This document lists organizations and institutions engaged during the HRDAO stakeholder research process between January and July 2025. No personal data is disclosed. All names, handles, and quotes from individuals have been redacted or omitted in accordance with GDPR and Amnesty International policies.

Inclusion of an organization indicates exploratory engagement, not formal endorsement, unless explicitly stated. All interactions were conducted ethically, transparently, and in pursuit of open, socially aligned governance design.

Stakeholder Reference Table (Final, GDPR-Compliant)

Organization / Institution	Region	Mode	Type / Focus
50 Partners	Europe	In-Person	VC / Incubator
Olympus	Global	Online	Learn-to-Earn Platform
AMLOK	MENA	Online	Crowdfunding Platform
DEGA	LATAM	Online	AI Gaming Protocol
SEED.photo	Global	In-Person	NFT Photography Platform
Artverse Café (Paris)	Europe	In-Person	Cultural Hub
Artifex lab (Paris)	Europe	In-Person	Cultural Hub and artist residency
NFT / Metaverse Studios (e.g. Clay Nation, Sandbox)	Global	In-Person	Immersive Design / Storytelling
Sovrun	SEA	In-Person	GameFi Ecosystem
Apex Fusion	Global	In-Person	Cardano Stakepool / Builder

TaskOn	APAC	In-Person	DAO Tooling
PlayFriends (Berachain)	Asia	In-Person	SocialFi Platform
Chainwire	Global	Online	DAO Media Syndicate
Media3	Global	In-Person	Web3 Media Collective
Bitskwela	Philippines	In-Person	DAO Education
Blockchain4Good Summit	EU	In-Person	NGO / DAO Events
LUKSO	Europe	In-Person	Identity Infrastructure
Stellar Development Foundation	Global	In-Person	Protocol Foundation
Emurgo / Emurgo Labs	Global	In-Person	Cardano R&D
Cardano Foundation / IOG	Global	In-Person	Governance / Infra Contributors
Celo EU / Superfluid	Europe	In-Person	Governance Tooling
Serotonin	Global	In-Person	Web3 Marketing
MEXC	Asia	In-Person	Exchange / Listing Partner
MissW	Korea	In-Person	KOL / Social Influence
Meria.com / Morningstar Ventures	Europe	In-Person	Investor Platform
Disruptive Elements	EU	In-Person	UNDP Partner

OneMoney Protocol	Global	In-Person	ReFi Stablecoin Design
Pyratz Labs	EU	In-Person	Incubator / Builder Hub
SingularityNET	Global	In-Person	DAO Research
University of Auckland (PhD Program)	NZ	Online	Tokenomics Research
University of Auckland (Digital Rights Network)	NZ	Email	Digital Ethics / Tokenomics
Open Origin	Global	Online	Transparency / Certification Tools
INTU (Self-Custody Wallets)	Global	In-Person	Keyless Identity Infrastructure
TON Foundation (Growth)	Global	In-Person	L1 Ecosystem Expansion
CoinEasy	Korea	In-Person	Exchange-Education Platform
Funding the Commons	Global	In-Person	Public Goods Governance and funding
Kernel	Global	Online	DAO Learning / Governance Theory
Toucan Protocol	Global	In-Person	ReFi Coordination Layer

Stakeholder Feedback – Raw Insights by Organization

(GDPR-Compliant — Catalyst Fund13, HRDAO Milestone 1)

SEED.photo (Photography NFT Platform) / Creative Contributors

- **Relevance to HRDAO:**
Emphasized the importance of provenance, verified authorship, and cultural metadata for decentralised human rights documentation.
Supports embedding creative contributions into DAO participation.
- **Encouraged inclusion of cultural metadata in governance history.**
Supported hybrid drops with provenance encoded into DAO archives.
- **Considerations / Risks:**
Clarity of alignment between on-chain identity, copyright, and open cultural licensing.
- **Ownership disputes may arise without universal licensing framework.**

Artverse (Paris Cultural Space)

- **Relevance to HRDAO:**
Endorsed HRDAO as a poetic tool for memory, activism, and public education through immersive experiences.
Interest in hosting hybrid DAO-art activations.
- **Considerations / Risks:**
Caution around public-facing political art under surveillance-heavy jurisdictions.

Cardano Foundation / IOG

- **Relevance to HRDAO:**
Provided insights on integrating with Voltaire governance (CIP-1694) and alignment with DReps and on-chain community voting, and token distribution.
Strong support for non-transferable governance tokens and on-chain voting thresholds.
- **Considerations / Risks:**
DAO must clarify how off-chain consensus links to on-chain finality without fragmentation.

LUKSO / Universal Profiles

- **Relevance to HRDAO:**
Proposed use of soulbound identity and reputation credentials via UPs.
Support for privacy-preserving on-chain personas with cross-DAO utility.
- **Considerations / Risks:**
Caution around profile centralization or UX bottlenecks if not implemented with opt-in control.

Emurgo Labs

- **Relevance to HRDAO:**
Technical feedback on token issuance, wallet compatibility, and soulbound enforcement.
Validation of dual-token architecture and incentive design.
- **Considerations / Risks:**
DAO must balance smart contract complexity with user accessibility.

Blockchain4Good Summit / Disruptive Elements

- **Relevance to HRDAO:**
Platform offered for DAO to be showcased as a Blockchain4Good aligned governance case study.
Encouraged HRDAO to position itself as an ethical infrastructure for social tech ecosystems.
- **Considerations / Risks:**
Suggested framing in terms of urban and institutional resilience to appeal to civil society partners.

TON Ecosystem (Telegram Foundation)

- **Relevance to HRDAO:**
Support for using TON-based interfaces for broader regional onboarding, particularly in Asia.
Potential bridge for DAO-lite apps with gamified experiences.
- **Considerations / Risks:**
Needs more clarity on interoperability with Cardano stack and privacy options.

Funding the Commons / ReFi Thought Leaders

- **Relevance to HRDAO:**
Advocated for commons-based design: mapping care work, visibility layers, and reputational systems that align with public goods logic.
Inspired ideas for DAO chartering and regenerative accountability.
- **Considerations / Risks:**
Need to avoid extractive token models under the guise of “impact metrics.”

Open Origin

- **Relevance to HRDAO:**
Offered perspective on verifiable proof-of-contribution using open source transparency tooling.

DAO integration for project-based legitimacy and public verification.

- **Considerations / Risks:**
Warned against overly complex attestations unless they serve a clear governance purpose.

Apex Fusion

- **Relevance to HRDAO:**
Active support for stakepool governance models and funding pathways within Cardano and Apex Fusion.
Alignment with Catalyst and long-term ecosystem incentives.
- **Considerations / Risks:**
Stress on delivering measurable milestones early to unlock broader support.

Superfluid / Celo EU

- **Relevance to HRDAO:**
Advised on continuous flow-based funding models and dynamic governance triggers.
Proposed quadratic staking or streaming rewards as long-term incentives.
- **Considerations / Risks:**
DAO must consider how real-time flows affect governance cadence and accountability.

Education Stakeholders (Bitskwela, Kernel)

- **Relevance to HRDAO:**
Strong emphasis on mobile-first, multi-language onboarding experiences.
Supported DAO as a learning infrastructure for young leaders and NGOs.
- **Considerations / Risks:**
Suggested accessibility UX audits and cultural review of metaphors used in onboarding.

Auckland University of Technology (PhD Governance & Ethics Research)

- **Relevance to HRDAO:**
Supportive of DAO as a living social experiment, tied to ethics of participation, consent, and non-speculation.
Advocated modular pilot before mainnet.
- **Considerations / Risks:**
Emphasized the importance of transparency in how contributors gain/lose rights, and how we assign value to actions beyond traditional KPIs and metrics.

Media Stakeholders (Media3, Chainwire, Serotonin, cattle daddy media)

- **Relevance to HRDAO:**
Shared insights on narrative development, ethical media campaigns, and cultural signaling.
Encouraged clarity in visual language and region-specific communications.
- **Considerations / Risks:**
Warned against corporate-sounding language or PR-driven optics that obscure grassroots intent.
