

HRDAO – Stakeholder Feedback Summary

Milestone Completion Report (v1.7)

Project: Human Rights DAO (HRDAO)

Milestone: Stakeholder Feedback

Date: July 2025

Prepared by: Razali Samsudin, Gareth Farry, Core Contributors to HRDAO

 This report contains no personal data or direct attribution.

Purpose of Document

This document consolidates thematic insights gathered between **February - July 2025** from 35+ contributors across the human rights, blockchain, privacy, and public goods domains. It serves to:

- Demonstrate **transparent, ethical stakeholder engagement**
 - Provide design input for HRDAO's next-phase development
 - Align with **GDPR principles**, decolonial values, and activist safety
 - Strengthen HRDAO's position as **infrastructure for collective care, resistance, and governance innovation**
-

Stakeholder Feedback (Paraphrased, Anonymous)

1. Civil Society & NGO Contributors

- DAO governance was welcomed by human rights stakeholders with **strong guardrails, ethical charters, and onboarding clarity**
- Legal clarity and institutional risk concerns require **progressive public education** and a safe testnet model

2. Blockchain Infrastructure, Identity & Governance

- Multi-tier governance models (Stewards, DReps, Sortition) received wide support
- Recommendations included **adaptive thresholds, modular SDKs, and public-verifiable storage**
- A leading Cardano-aligned accelerator expressed interest in **supporting HRDAO's pilot or education tooling via their venture pipeline**

3. Privacy, Security & ZK Design

- Contributors advocated for **zk-ID, stealth interactions, pseudonymous participation, and metadata minimization**
- Emphasis on *resistance-safe UX*, progressive disclosure, and **opt-in privacy defaults**

4. Ecosystem & DAO Infrastructure Partners

- Engineers and DAO advisors from **multi-chain environments (Superfluid, CELO, LUKSO)** shared interest in:
 - Modular DAO treasuries
 - Streaming mechanisms for collective budgeting
 - Interoperable DAO skeletons for community governance
- HRDAO was affirmed as a candidate for **experimental governance using programmable value and identity layers**

5. Stablecoin, DeFi, and Payments Protocols

- Founders of mission-aligned stablecoin projects expressed readiness to support **cross-border, activist-safe treasury systems**
 - Use cases include: campaign escrow, emergency microfunding, and remittance-compatible rights-based DAOs
-

6. Public Goods & Narrative Partners

- Collaborators from the **Blockchain for Good Alliance**, **Cultural DAOs**, and **ZK media advocates** emphasized:
 - Co-creating DAO literacy tools
 - Threads of Solidarity as a transmedia governance layer
 - Visual governance carousels and **civic mythmaking** through decolonial metaphors
-

7. Civic Movement Builders & Global Activists

- A Southeast Asian activist shared that institutional inaction (e.g. in Papua, West Papua, Palestine) has delegitimized some NGOs
 - HRDAO was seen as a **digital movement infrastructure to support what institutions cannot**
 - Needs: **privacy, real funding autonomy, multilingual access, legal risk protection**
-

8. Events & Collaborative Strategy Platforms

- Teams from the **Blockchain4Good Summit** offered HRDAO visibility in panels, cross-sector matchmaking, and civic tech storytelling
- Strategic collaborators from regional and UN-affiliated governance circles affirmed interest in **community-led, rights-based DAO infrastructure**

- Summit organizers flagged HRDAO as “a **movement layer with measurable governance depth**”

Updated Action Framework

Area	Key Explorative Actions
Governance	Finalize DAO Charter; integrate DRep & sortition; align with Universal Profiles + programmable treasuries
Tokenomics	Deploy dual-token system; reflect non-code contributions; prepare stablecoin use case pilots
Privacy & Safety	Implement zk-ID + stealth layers; define metadata & consent UX; design jurisdiction-aware frontend variants
Identity & UX	Explore LUKSO Universal Profiles; prototype onboarding zines; non-verbal voting tools
Infrastructure	Align with CIP-1694; modular SDK + API design; cross-chain deployable governance UI
Education	Publish multilingual plain-language guide; mirror as community storytelling artifact
Legal	Run legal risk protocol in partnership with aligned legal and civic tech experts

GDPR & Data Ethics Statement

This document:

- Does **not** include names, quotes, emails, or identifiable data
- Abstracts stakeholder roles into thematic clusters (by domain, not individual)
- Adheres to the principles of **purpose limitation**, **data minimization**, and **participant protection**
- Ensures full GDPR compliance for all Catalyst-facing documentation
